## Goldiam Jewellery Limited

### Summary of Significant Accounting Policies and Other Explanatory Information for the year ended March 31, 2020

#### Company Information

Goldiam Jewellery Limited (the Company) is a public limited company domiciled in India with its registered office located at Gems & Jewellery Complex, M.I.D.C., SEEPZ, Andheri (East) Mumbai - 400 096. The Company is engaged in manufacturing and export of Diamond studded Gold & Silver Jewellery.

#### A. Basis of Preparation

##### I) Compliance with Ind AS

These financial statements have been prepared in accordance with the Indian Accounting Standards (hereinafter referred to as the 'Ind AS') as notified by Ministry of Corporate Affairs pursuant to section 133 of the Companies Act, 2013 read with Rule 3 of the Companies (Indian Accounting Standards) Rules, 2015 and Companies (Indian Accounting Standards) Amendment Rules, 2016.

The financial statements have been prepared on accrual and going concern basis. The accounting policies are applied consistently to all the periods presented in the financial statements, including the preparation of the opening Ind AS Balance Sheet as at 1<sup>st</sup> April, 2016 being the 'date of transition to Ind AS'. All assets and liabilities have been classified as current or non-current as per the Company's normal operating cycle and other criteria set out in the Division II of Schedule III to the Companies Act, 2013. Based on the nature of products and the time between acquisition of assets for processing and their realisation in cash and cash equivalents, the Company has ascertained its operating cycle as 12 months for the purpose of current or non-current classification of assets and liabilities.

Financial statements are presented in ₹, which is the functional currency of the Company and all values are rounded to the nearest Lakhs, except when otherwise indicated, further the transactions and balances with values below the rounding off norm adopted by the Company have been reflected as "0" in the relevant notes in these financial statements.

The financial statements of the Company for the year ended March 31, 2020 were approved for issue in accordance with the resolution of the Board of Directors on June 25, 2020

##### II) Current versus non current classification

The Company presents assets and liabilities in the balance sheet based on current/ non-current classification. An asset is classified as current when it is :

- \* Expected to be realised or intended to sold or consumed in normal operating cycle.
  - \* Held primarily for the purpose of trading
  - \* Expected to be realised within twelve months after the reporting period, or
  - \* Cash or cash equivalent unless restricted from being exchanged or used to settle a liability for at least twelve months after the reporting period.
- All other assets are classified as non-current.

##### A liability is classified as current when:

- \* It is expected to be settled in normal operating cycle
- \* It is held primarily for the purpose of trading
- \* It is due to be settled within twelve months after the reporting period, or
- \* There is no unconditional right to defer the settlement of the liability for at least twelve months after the reporting period.

All other liabilities are classified as non-current.

## B KEY ACCOUNTING ESTIMATES AND JUDGEMENTS

The preparation of financial statements requires management to make judgments, estimates and assumptions in the application of accounting policies that affect the reported amounts of assets, liabilities, income and expenses. Actual results may differ from these estimates. Continuous evaluation is done on the estimation and judgments based on historical experience and other factors, including expectations of future events that are believed to be reasonable. Revisions to accounting estimates are recognised prospectively.

Information about critical judgments in applying accounting policies, as well as estimates and assumptions that have the most significant effect to the carrying amounts of assets and liabilities within the next financial year, are included in the following notes:

- (a) Measurement of defined benefit obligations - Note 24
- (b) Measurement and likelihood of occurrence of provisions and contingencies - Note 41
- (c) Recognition of deferred tax assets - Note 5

## C SIGNIFICANT ACCOUNTING POLICIES

### a) Property, Plant and Equipment:

Property, plant and equipment are stated at their cost of acquisition. The cost comprises purchase price, borrowing cost if capitalisation criteria are met and directly attributable cost of bringing the asset to its working condition for the intended use.

Subsequent costs are included in the asset's carrying amount or recognised as a separate asset, as appropriate, only when it is probable that future economic benefits associated with the item will flow to the Company. All other repair and maintenance costs are recognised in statement of profit and loss as incurred.

#### Subsequent measurement (depreciation and useful lives) :

Depreciation on property, plant and equipment is provided on written-down value, computed on the basis of useful lives (as set out below) prescribed in Schedule II the Act:

The amortisation period and the amortisation method for finite-life intangible assets is reviewed at each financial year end and adjusted prospectively, if appropriate.

Description of Asset	Estimated useful life (in years)
Buildings	30
Plant and equipment	15
Office equipment	5
Computers	3
Computer software	5
Furniture and fixtures	10
Vehicles	8

Leasehold improvements have been amortised over the estimated useful life of the assets or the period of lease, whichever is lower. The residual values, useful lives and method of depreciation are reviewed at each financial year end and adjusted prospectively, if appropriate.

Material items such as spare parts, stand-by equipment and service equipment are classified as PPE when they meet the definition of PPE as specified in Ind AS 16 - Property, Plant and Equipment.

#### De-recognition

An item of property, plant and equipment and any significant part initially recognised is derecognised upon disposal or when no future economic benefits are expected from its use or disposal. Any gain or loss arising on de-recognition of the asset (calculated as the difference between the net disposal proceeds and the carrying amount of the asset) is included in the income statement when the asset is derecognised.

### b) Investment Properties :

Property that is held for long-term rental yields or for capital appreciation or both, and that is not occupied by the Company, is classified as investment property. Investment property is measured at its cost, including related transaction costs, and impairment if any.

### c) Impairment of non-financial assets

At each reporting date, the Company assesses whether there is any indication based on internal/external factors, that an asset may be impaired. If any such indication exists, the Company estimates the recoverable amount of the asset. If such recoverable amount of the asset or the recoverable amount of the cash generating unit to which the asset belongs is less than its carrying amount, the carrying amount is reduced to its recoverable amount and the reduction is treated as an impairment loss and is recognised in the statement of profit and loss. All assets are subsequently reassessed for indications that an impairment loss previously recognised may no longer exist. An impairment loss is reversed if the asset's or cash-generating unit's recoverable amount exceeds its carrying amount.

The impairment losses and reversals are recognised in statement of profit and loss.

#### d) Financial instruments

##### Financial assets

##### Initial recognition and measurement

Financial assets are recognised when the Company becomes a party to the contractual provisions of the instrument.

##### Subsequent measurement

On initial recognition, a financial asset is recognised at fair value, in case of Financial assets which are recognised at fair value through profit and loss (FVTPL), its transaction cost are recognised in the statement of profit and loss. In other cases, the transaction cost are attributed to the acquisition value of the financial asset.

##### Financial assets are subsequently classified as measured at

- amortised cost.
- fair value through profit and loss (FVTPL).
- fair value through other comprehensive income (FVOCI).

Financial assets are not reclassified subsequent to their recognition, except if and in the period the Company changes its business model for managing financial assets.

##### Trade Receivables and Loans:

Trade receivables are initially recognised at fair value. Subsequently, these assets are held at amortised cost, using the effective interest rate (EIR) method net of any expected credit losses. The EIR is the rate that discounts estimated future cash income through the expected life of financial instrument.

##### Mutual Funds, Equity investment, bonds and other financial instruments :

Mutual Funds, Equity Investment, bonds and other financial instruments are initially measured at amortised cost, fair value through other comprehensive income ('FVOCI') or fair value through profit or loss ('FVTPL') till derecognition on the basis of (i) the Company's business model for managing the financial assets and (ii) the contractual cash flow characteristics of the financial asset.

##### i) Measured at amortised cost:

Financial assets that are held within a business model whose objective is to hold financial assets in order to collect contractual cash flows that are solely payments of principal and interest, are subsequently measured at amortised cost.

##### ii) Measured at fair value through other comprehensive income (FVOCI):

Mutual Funds, Equity investment, bonds and other financial instruments in the scope of Ind As 109 are measured at fair value through profit and loss account( FVOCI).

##### iii) Measured at fair value through profit or loss (FVTPL):

A financial asset not classified as either amortised cost or FVOCI, is classified as FVTPL. Such financial assets are measured at fair value with all changes in fair value.

##### Financial liabilities

##### Initial recognition and measurement

All financial liabilities are recognised initially at fair value and transaction cost that is attributable to the acquisition of the financial liabilities is also adjusted. These liabilities are classified as amortised cost.

##### Subsequent measurement

Subsequent to initial recognition, these liabilities are measured at amortised cost using the effective interest method. These liabilities include borrowings.

##### De-recognition of financial liabilities

A financial liability is de-recognised when the obligation under the liability is discharged or cancelled or expires. When an existing financial liability is replaced by another from the same lender on substantially different terms, or the terms of an existing liability are substantially modified, such an exchange or modification is treated as the de- recognition of the original liability and the recognition of a new liability. The difference in the respective carrying amounts is recognised in the statement of profit and loss.

**e) Impairment of financial assets**

In accordance with Ind AS 109, the Company applies expected credit loss (ECL) model for measurement and recognition of impairment loss for financial assets.

ECL is the difference between all contractual cash flows that are due to the Company in accordance with the contract and all the cash flows that the Company expects to receive. When estimating the cash flows, the Company is required to consider –

- All contractual terms of the financial assets (including prepayment and extension) over the expected life of the assets.
- Cash flows from the sale of collateral held or other credit enhancements that are integral to the contractual terms

**Trade receivables**

The Company applies approach permitted by Ind AS 109, financial instruments, which requires expected lifetime losses to be recognised from initial recognition of receivables.

**Other financial assets**

For recognition of impairment loss on other financial assets and risk exposure, the Company determines whether there has been a significant increase in the credit risk since initial recognition and if credit risk has increased significantly, impairment loss is provided.

**f) Inventories**

**Raw Material:** Lower of cost or net realisable value. Cost is determined on first in first out ('FIFO') basis.

Work in progress, manufactured finished goods and traded goods are valued at lower of cost and net realisable value. Cost of work in progress and manufactured finished goods comprises direct material, cost of conversion and other costs incurred in bringing these inventories to their present location and condition. Trading goods are valued at Cost or net realisable value, whichever is lower.

**Finished goods:** Lower of cost or net realisable value. Cost is determined on FIFO basis, includes direct material and labour expenses and appropriate proportion of manufacturing overheads based on the normal capacity for manufactured goods.

Net realisable value is the estimated selling price in the ordinary course of business less estimated costs of completion and estimated costs of necessary to make the sale.

**g) Foreign Currency Translation**

**Initial recognition**

The Company's financial statements are presented in INR, which is also the Company's functional currency. Transactions in foreign currencies are recorded on initial recognition in the functional currency at the exchange rates prevailing on the date of the transaction.

**Measurement at the balance sheet date**

Foreign currency monetary items of the Company, outstanding at the balance sheet date are restated at the year-end rates. Non-monetary items which are carried at historical cost denominated in a foreign currency are reported using the exchange rate at the date of the transaction. Non-monetary items measured at fair value in a foreign currency are translated using the exchange rates at the date when the fair value is determined.

**Treatment of exchange difference**

Exchange differences that arise on settlement of monetary items or on reporting at each balance sheet date of the Company's monetary items at the closing rate are recognised as income or expenses in the period in which they arise.

**h) Income taxes :**

Tax expense recognised in statement of profit and loss comprises the sum of deferred tax and current tax not recognised in Other Comprehensive Income ('OCI') or directly in equity.

Current income-tax is measured at the amount expected to be paid to the tax authorities in accordance with the Indian Income-tax Act. Current income-tax relating to items recognised outside statement of profit and loss (either in OCI or in equity). The company has provided the current tax as per the announcement by The Government of India, on September 20, 2019, vide the Taxation Laws (Amendment) Ordinance 2019, inserted a new Section 115BAA in the Income Tax Act, 1961, which provides an option to the Company for paying Income Tax at reduced rates as per the provisions/conditions defined in the said section.

Deferred income-tax is calculated using the liability method. Deferred tax liabilities are generally recognised in full for all taxable temporary differences. Deferred tax assets are recognised to the extent that it is probable that the underlying tax loss, unused tax credits or deductible temporary difference will be utilised against future taxable income. This is assessed based on the Company's forecast of future operating results, adjusted for significant non-taxable income and expenses and specific limits on the use of any unused tax loss or credit. Deferred tax assets or liability arising during tax holiday period is not recognised to the extent it reverses out within the tax holiday period. Unrecognised deferred tax assets are re-assessed at each reporting date and are recognised to the extent that it has become probable that future taxable profits will allow the deferred tax asset to be recovered.

Deferred tax assets and liabilities are measured at the tax rates that are expected to apply in the year when the asset is realised or the liability is settled, based on tax rates (and tax laws) that have been enacted or substantively enacted at the reporting date. Deferred tax relating to items recognised outside statement of profit and loss is recognised outside statement of profit and loss (either in OCI or in equity).

**i) Cash and cash equivalents**

Cash and cash equivalents comprise cash in hand, demand deposits with banks/corporations and short-term highly liquid investments (original maturity less than 3 months) that are readily convertible into known amount of cash and are subject to an insignificant risk of change in value.

**j) Post-employment, long term and short term employee benefits**

**Defined contribution plans**

Provident fund benefit is a defined contribution plan under which the Company pays fixed contributions into funds established under the Employees' Provident Funds and Miscellaneous Provisions Act, 1952. The Company has no legal or constructive obligations to pay further contributions after payment of the fixed contribution.

**Defined benefit plans**

Gratuity is a post-employment benefit defined under The Payment of Gratuity Act, 1972 and is in the nature of a defined benefit plan. The liability recognised in the financial statements in respect of gratuity is the present value of the defined benefit obligation at the reporting date, together with adjustments for unrecognised actuarial gains or losses and past service costs. The defined benefit/obligation is calculated at or near the reporting date by an independent actuary using the projected unit credit method

Actuarial gains and losses arising from past experience and changes in actuarial assumptions are credited or charged to the statement of OCI in the year in which such gains or losses are determined.

**Other long-term employee benefits**

Liability in respect of compensated absences is estimated on the basis of an actuarial valuation performed by an independent actuary using the projected unit credit method.

Actuarial gains and losses arising from past experience and changes in actuarial assumptions are charged to statement of profit and loss in the year in which such gains or losses are determined

**Short-term employee benefits**

Expense in respect of other short term benefits is recognised on the basis of the amount paid or payable for the period during which services are rendered by the employee.

**k) Operating expenses**

Operating expenses are recognised in profit or loss upon utilisation of the service or as incurred.

**l) Borrowing costs**

Borrowing costs directly attributable to the acquisitions, construction or production of a qualifying asset are capitalised during the period of time that is necessary to complete and prepare the asset for its intended use or sale. Other borrowing costs are expensed in the period in which they are incurred and reported in finance costs.

**m) Fair value measurement**

The Company measures financial instruments, at fair value at each balance sheet date.

Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. The fair value measurement is based on the presumption that the transaction to sell the asset or transfer the liability takes place either:

- In the principal market for the asset or liability, or
- In the absence of a principal market, in the most advantageous market for the asset or liability

The principal or the most advantageous market must be accessible by the Company.

The fair value of an asset or a liability is measured using the assumptions that market participants would use when pricing the asset or liability, assuming that market participants act in their economic best interest.

**n) Provisions, contingent assets and contingent liabilities**

Provisions are recognised when the Company has a present legal or constructive obligation as a result of past events, it is probable that an outflow of resources will be required to settle the obligation and the amount can be reliably estimated. Provisions are not recognised for future operating losses.

Provisions are measured at the present value of management's best estimate of the expenditure required to settle the present obligation at the end of the reporting period. The discount rate used to determine the present value is a pre tax rate that reflects current market assessments of the time value of money and the risks specific to the liability. The increase in the provision due to the passage of time is recognised as interest expense.

Contingent liability is disclosed for:

- Possible obligations which will be confirmed only by future events not wholly within the control of the Company or
- Present obligations arising from past events where it is not probable that an outflow of resources will be required to settle the obligation or a reliable estimate of the amount of the obligation cannot be made.

Contingent assets are not recognized. However, when inflow of economic benefit is probable, related asset is disclosed.

**o) Earnings per share**

Basic earnings per share is calculated by dividing the net profit or loss for the period attributable to equity shareholders (after deducting attributable taxes) by the weighted average number of equity shares outstanding during the period. The weighted average number of equity shares outstanding during the period is adjusted for events including a bonus issue.

For the purpose of calculating diluted earnings per share, the net profit or loss for the period attributable to equity shareholders and the weighted average number of shares outstanding during the period are adjusted for the effects of all dilutive potential equity shares.

**p) Significant management judgement in applying accounting policies and estimation uncertainty**

The preparation of the Company's financial statements requires management to make judgements, estimates and assumptions that affect the reported amounts of revenues, expenses, assets and liabilities, and the related disclosures.

Significant management judgements and estimates

The following are significant management judgements and estimates in applying the accounting policies of the Company that have the most significant effect on the financial statements.

Recognition of deferred tax assets – The extent to which deferred tax assets can be recognised is based on an assessment of the probability of the future taxable income against which the deferred tax assets can be utilised.

Evaluation of indicators for impairment of assets – The evaluation of applicability of indicators of impairment of assets requires assessment of several external and internal factors which could result in deterioration of recoverable amount of the assets.

Recoverability of advances/receivables – At each balance sheet date, based on historical default rates observed over expected life, the management assesses the expected credit loss on outstanding receivables and advances.

Defined benefit obligation (DBO) – Management's estimate of the DBO is based on a number of critical underlying assumptions such as standard rates of inflation, medical cost trends, mortality, discount rate and anticipation of future salary increases. Variation in these assumptions may significantly impact the DBO amount and the annual defined benefit expenses.

Fair value measurements – Management applies valuation techniques to determine the fair value of financial instruments (where active market quotes are not available). This involves developing estimates and assumptions consistent with how market participants would price the instrument. Management uses the best information available. Estimated fair values may vary from the actual prices that would be achieved in an arm's length transaction at the reporting date

Useful lives of depreciable/amortizable assets – Management reviews its estimate of the useful lives of depreciable/amortizable assets at each reporting date, based on the expected utility of the assets. Uncertainties in these estimates relate to technical and economic obsolescence.

#### g) Revenue recognition

The Company derives revenues primarily from sale of manufactured goods, traded goods and related services.

The core principle of Ind AS 115 is that an entity should recognise revenue to depict the transfer of promised goods or services to customers in an amount that reflects the consideration to which the entity expects to be entitled in exchange for those goods or services. Specifically, the standard introduces a 5-step approach to revenue recognition:

Revenue is recognized on satisfaction of performance obligation upon transfer of control of products to customers in an amount that reflects the consideration the Company expects to receive in exchange for those products.

- Step 1: Identify the contract(s) with a customer
- Step 2: Identify the performance obligation in contract
- Step 3: Determine the transaction price
- Step 4: Allocate the transaction price to the performance obligations in the contract
- Step 5: Recognise revenue when (or as) the entity satisfies a performance obligation

The Company evaluates the arrangement with customers, considering underlying substance and terms and conditions of the arrangements. Revenue is accounted either on gross or net basis based on the expected discounts to be offered to customers.

#### Interest Income

Interest income is recognised on an accrual basis using the effective interest method.

#### Dividend

Dividends are recognised at the time the right to receive the payment is established.

#### r) Operating Segment

The managing committee is considered to be the 'Chief Operating Decision Maker' (CODM) as defined in IND AS 108. The Operating Segment is the level at which discrete financial information is available. The CODM allocates resources and assess performance at this level. The Company has identified the below operating segments:

- a) Jewellery Manufacturing Activity.
- b) Investment Activity.

#### s) Accounting policy for Lease :

##### Company as a lessee :

The Company applies a single recognition and measurement approach for all leases, except for short-term leases and leases of lowvalue assets. The Company recognises lease liabilities to make lease payments and right-of-use assets representing the right to use the underlying assets.

As per Ind A S 116, the lessee needs to recognise depreciation on rights of use assets and finance costs on lease liabilities in the statement of profit and loss. There will not be any material effect of the said implementation of Ind As 116 to the Company.

##### Company as a lessor:

Leases in which the Company does not transfer substantially all the risks and rewards incidental to ownership of an asset are classified as operating leases. Rental income arising is accounted for on a straight-line basis over the lease terms. Initial direct costs incurred in negotiating and arranging an operating lease are added to the carrying amount of the leased asset and recognised over the lease term on the same basis as rental income. Contingent rents are recognised as revenue in the period in which they are earned.

Contribution to Provident Fund is ₹. 0.82 Lakhs/- (Previous Year ₹ 0.77 Lakhs) , ESIC and Labour Welfare Fund Includes ₹. 0.05 Lakhs (Previous Year ₹. 0.07 Lakhs).

## Summary of Significant Accounting Policies and Other Explanatory Information for the year ended March 31, 2020

## Defined Benefit Plan

## Gratuity and Leave Encashment

The Company makes partly annual contribution to the Employees' Group Gratuity-cum-Life Assurance Scheme of the Life Insurance Corporation of India, a funded benefit plan for qualifying employees. The scheme provides for lump sum payment to vested employees at retirement, death while in employment or on termination of employment of an amount equivalent to 15 days service for each completed year of service or part thereof depending on the date of joining. The benefit vests after five years of continuous service.

## Goldiam Jewellery Limited

### Summary of Significant Accounting Policies and Other Explanatory Information for the year ended March 31, 2020

#### Note 35 - Financial instruments

##### i) Fair values hierarchy

Financial assets and financial liabilities measured at fair value in the statement of financial position are grouped into three levels of a fair value hierarchy. The three levels are defined based on the observability of significant inputs to the measurement, as follows:

Level 1: quoted prices (unadjusted) in active markets for identical assets or liabilities;

Level 2: The fair value of financial instruments that are not traded in an active market is determined using valuation techniques which maximise the use of observable market data and rely as little as possible on entity specific estimates.

Level 3: inputs for the asset or liability that are not based on observable market data (unobservable inputs).

#### Financial assets and liabilities measured at fair value - recurring fair value measurements

As at March 31, 2020	Level 1	Level 2	Level 3	Total
<b>Financial assets</b>				
Investments at fair value through profit or loss				
Equity	-	-	-	-
Mutual funds	-	5,178.48	-	5,178.48
Bonds	-	-	-	-
Other	-	-	931.76	931.76
<b>Total financial assets</b>	<b>-</b>	<b>5,178.48</b>	<b>931.76</b>	<b>6,110.24</b>
<b>As at March 31, 2019</b>	<b>Level 1</b>	<b>Level 2</b>	<b>Level 3</b>	<b>Total</b>
<b>Financial assets</b>				
Investments at fair value through profit or loss				
Equity	-	-	-	-
Mutual funds	56.34	3,033.96	-	3,090.30
Bonds	-	-	-	-
Other	-	-	1,125.24	1,125.24
<b>Total financial assets</b>	<b>56.34</b>	<b>3,033.96</b>	<b>1,125.24</b>	<b>4,215.54</b>

##### (ii) Valuation process and technique used to determine fair value

Specific valuation techniques used to value financial instruments include:

(a) The use of quoted market prices for investments in mutual funds.

(b) Use of market available inputs such as gold prices and foreign exchange rates for option to fix prices of gold in purchase contracts and foreign currency forward contracts.

**Goldiam Jewellery Limited**

**Summary of Significant Accounting Policies and Other Explanatory Information for the year ended March 31, 2020**

**Note 36 -Financial Risk Management:**

**i) Financial Instruments by Cartagory :**

Particulars	As at March 31, 2020		As at March 31, 2019	
	FVOCI	Amortised Cost	FVOCI	Amortised Cost

a) The carrying value of trade receivables, securities deposits, insurance claim receivable, loans given, cash and bank balances and other financial assets recorded at amortised cost, is considered to be a reasonable approximation of fair value.

The carrying value of borrowings, trade payables and other financial liabilities recorded at amortised cost is considered to be a reasonable approximation of fair value.

**ii) risk management**

The Company's activities expose it to market risk, liquidity risk and credit risk. This note explains the sources of risk which the entity is exposed to and how the entity manages the risk and the related impact in the financial statements:

Risk	Exposure arising from	Measurement	Management
Credit risk	Cash and cash equivalents, trade receivables, derivative financial instruments, financial assets measured at amortised cost	Aging analysis	Bank deposits, diversification of asset base, credit limits and collateral.
Liquidity risk	Borrowings and other liabilities	Rolling cash flow forecasts	Availability of committed credit lines and borrowing facilities.
Market risk - foreign exchange	Recognised financial assets and liabilities not denominated in Indian rupee (Rs.)	Cash flow forecasting sensitivity analysis	Forward contracts
Market risk - interest rate	Borrowings at variable rates	Sensitivity analysis	Mix of borrowings taken at fixed and floating rates.
Market risk - gold prices	Payables linked to gold prices	Sensitivity analysis	The gold is purchase at the prevailing price from nominated agencies.
Market risk - security price	Investments in equity securities	Sensitivity analysis	Portfolio diversification.

## A) Credit Risk

Credit risk is the risk that a customer or counterparty to a financial instrument will fail to perform or pay amounts due to the Company causing financial loss. It arises from cash and cash equivalents, deposits with banks and financial institutions, security deposits, loans given and principally from credit exposures to customers relating to outstanding receivables. The Company's maximum exposure to credit risk is limited to the carrying amount of financial assets recognised at reporting date.

The Company continuously monitors defaults of customers and other counterparties, identified either individually or by the Company, and incorporates this information into its credit risk controls. Where available at reasonable cost, external credit ratings and/or reports on customers and other counterparties are obtained and used. The Company's policy is to deal only with creditworthy counterparties.

In respect of trade and other receivables, the Company is not exposed to any significant credit risk exposure to any single counterparty or any company of counterparties having similar characteristics. Trade receivables consist of a large number of customers in various geographical areas. The Company has very limited history of customer default, and considers the credit quality of trade receivables that are not past due or impaired to be good.

The credit risk for cash and cash equivalents, mutual funds, bank deposits, loans and derivative financial instruments is considered negligible, since the counterparties are reputable organisations with high quality external credit ratings.

Company provides for expected credit losses on financial assets by assessing individual financial instruments for expectation of any credit losses. Since the assets have very low credit risk, and are for varied natures and purpose, there is no trend that the company can draw to apply consistently to entire population. For such financial assets, the Company's policy is to provide for 12 month expected credit losses upon initial recognition and provides for lifetime expected credit losses upon significant increase in credit risk. The Company does not have any expected loss based impairment recognised on such assets considering their low credit risk nature, though incurred loss provisions are disclosed under each sub-category of such financial assets.

Detail of trade receivables that are past due is given below:

(Amounts are in lakhs unless stated otherwise)

Particulars	As at March	As at March
	31, 2020	31, 2019
Not due	9,594.13	9,037.35
0-30 days past due	477.00	307.44
31-60 days past due	347.33	234.87
61-90 days past due	187.03	70.31
More than 91 days	814.66	323.92
*rounded off to nil		
	<b>11,420.14</b>	<b>9,973.88</b>

## B) Liquidity risk

Prudent liquidity risk management implies maintaining sufficient cash and marketable securities and the availability of funding through an adequate amount of committed credit facilities to meet obligations when due. Due to the nature of the business, the Company maintains flexibility in funding by maintaining availability under committed facilities.

Management monitors rolling forecasts of the Company's liquidity position and cash and cash equivalents on the basis of expected cash flows. The Company takes into account the liquidity of the market in which the entity operates. In addition, the Company's liquidity management policy involves projecting cash flows in major currencies and considering the level of liquid assets necessary to meet these, monitoring balance sheet liquidity ratios against internal and external regulatory requirements and maintaining debt financing plans.

## Financing arrangements

The Company had access to the following undrawn borrowing facilities at the end of the reporting period:

(Amounts are in lakhs unless stated otherwise)

Particulars	As at March	As at March
	31, 2020	31, 2019
Expiring within one year (bank overdraft and other facilities)	378.33	1,037.33
Expiring beyond one year (bank loan)	-	-
<b>Total</b>	<b>378.33</b>	<b>1,037.33</b>

### Contractual maturities of financial liabilities

The tables below analyse the Company's financial liabilities into relevant maturity groupings based on their contractual maturities for all non-derivative financial liabilities. The amounts disclosed in the table are the contractual undiscounted cash flows. Balances due within 12 months equal their carrying amounts as the impact of discounting is not significant.

As at March 31, 2020	Payable on demand	Less than 1 year	Less than 1-2 year	Less than 2-3 year	More than 3 year	Total
Borrowings	-	378.33	-	-	-	378.33
Trade payable	-	3,757.92	0.04	1.96	3.96	3,763.89
Other financial liabilities	1.09	26.13	-	-	-	27.22
<b>Total</b>						

As at March 31, 2019	Payable on demand	Less than 1 year	Less than 1-2 year	Less than 2-3 year	More than 3 year	Total
Borrowings	-	1,037.33	-	-	-	1,037.33
Trade payable	-	2,772.85	4.56	4.71	2.73	2,784.84
Other financial liabilities	29.90	130.83	-	-	-	160.73
<b>Total</b>						

### C) Market risk - foreign exchange

The Company is exposed to foreign exchange risk arising from foreign currency transactions, primarily with respect to US Dollar. Foreign exchange risk arises from recognised assets and liabilities denominated in a currency that is not the Company's functional currency. The Company, as per its overall strategy, uses forward contracts to mitigate its risks associated with fluctuations in foreign currency, and such contracts are not designated as hedges under Ind AS 109. The Company does not use forward contracts and swaps for speculative purposes.

#### Sensitivity

The sensitivity to profit or loss from changes in the exchange rates arises mainly from financial instruments denominated in USD. In case of a reasonably possible change in INR/USD exchange rates of +/- 5% (previous year +/-3%) at the reporting date, keeping all other variables constant, there would have been an impact on profits of INR 1167.26 Lakhs (previous year INR 652.88 Lakhs).

### D) Interest rate risk

#### i) Liabilities

The Company's policy is to minimise interest rate cash flow risk exposures on long-term financing. At 31 March 2020, the Company is exposed to changes in market interest rates through bank borrowings at variable interest rates.

Interest rate risk exposure.

Below is the overall exposure of the Company to interest rate risk:

(Amounts are in lakhs unless stated otherwise)

Particulars	As at March 31, 2020	As at March 31, 2019
Variable rate borrowing	378.33	1,037.33
Fixed rate borrowing	-	-
<b>Total Borrowings</b>	<b>378.33</b>	<b>1,037.33</b>

#### Sensitivity

The sensitivity to profit or loss in case of a reasonably possible change in interest rates of +/- 50 basis points (previous year: +/- 50 basis points), keeping all other variables constant, would have resulted in an impact on profits by INR 3.78 Lakhs (previous year INR 10.37 Lakhs).

#### ii) Assets

The Company's financial assets are carried at amortised cost and are at fixed rate only. They are, therefore, not subject to interest rate risk since neither the carrying amount nor the future cash flows will fluctuate because of a change in market interest rates.

### E) Price risk

#### Exposure from investments in mutual funds:

The Company's exposure to price risk arises from investments in mutual funds held by the Company and classified in the balance sheet as fair value through profit or loss. To manage its price risk arising from investments in mutual funds, the Company diversifies its portfolio. Diversification of the portfolio is done in accordance with the limits set by the Company.

#### Sensitivity

The sensitivity to profit or loss in case of an increase in price of the instrument by 5% keeping all other variables constant would have resulted in an impact on profits by INR 611.02 Lakhs (previous year INR 421.55 Lakhs).

**Exposure from trade payables:**

The Company's exposure to price risk also arises from trade payables of the Company that are at unfixed prices, and, therefore, payment is sensitive to changes in gold prices. The option to fix gold prices are classified in the balance sheet as fair value through profit or loss. The option to fix gold prices are at unfixed prices to hedge against potential losses in value of inventory of gold held by the Company.

The Company applies fair value hedge for the gold purchased whose price is to be fixed in future. Therefore, there will no impact of the fluctuation in the price of the gold on the Company's profit for the period.

**Note 31 - Capital Management:**

The Company's capital management objectives are:

to ensure the Company's ability to continue as a going concern  
to provide an adequate return to shareholders

The Company monitors capital on the basis of the carrying amount of equity less cash and cash equivalents as presented on the face of balance sheet.

The Management assesses the Company's capital requirements in order to maintain an efficient overall financing structure while avoiding excessive leverage. This takes into account the subordination levels of the Company's various classes of debt. The Company manages the capital structure and makes adjustments to it in the light of changes in the economic conditions and the risk characteristics of the underlying assets. In order to maintain or adjust the capital structure, the Company may adjust the amount of dividends paid to shareholders, return capital to shareholders, issue new shares, or sell assets to reduce debt.

**The Company monitors capital on the basis of the following ratios:****1. Equity ratio - Total equity divided by Total assets****(Amounts are in lakhs unless stated otherwise)**

Particulars	As at March	As at March
	31, 2020	31, 2019
Total equity	17,472.81	14,657.00
Total Assets	21,861.97	18,959.26
Equity ratio	79.92%	77.31%

**2. Debt equity ratio - Total debt divided by Total equity**

Total debt = Long term borrowings + Short term borrowings

Particulars	As at March	As at March
	31, 2020	31, 2019
Total debts	378.33	1,037.33
Total equity	17,472.81	14,657.00
Debt equity Ratio	2.17%	7.08%
